The care of evergreens is one of the things that has been sadly neglected in our vicinity. Inasmuch as in recent years extensive planting of evergreens has been done, these plantings have not been cared for in the proper manner—if at all. Evergreens as well as shrubbery have grown practically wild and with proper shearing and pruning evergreens and shrubs can be kept to a minimum size. It is as important to shear and prune your evergreens as it is to mow your lawn. Our men are experienced in this work, and know how it should be done. With proper fertilizing your evergreens and shrubbery will have bright green foliage and not rank growth.

Plant Protectors

Protect the Cabbage and Cauliflower Plants

The maggot fly is the greatest pest to these plants and "Keepway Plant Protectors" will give the plants 90 to 100% protection. The size of the Protector is 3 in. by 3 in., and will cost as follows, post-paid to the fourth zone, beyond which send additional: Package of 24 for 10c; 72 for 25c; 144 for 45c.. 500 for \$1.25; 1000 for \$1.95. Write for prices on larger quantities.

MOSS IN YOUR LAWN AND WHAT TO DO ABOUT IT

A wide-spread notion has been that the presence of moss in your lawn was a positive proof that the soil was acid and sour and that lime should be used to correct this condition. Experiments have proven that lime will not check the growth of moss. Certain experiments have even proven that the lime encouraged its growth. The best method of ridding your lawn of moss is to improve the drainage in case you find it defective—or to fertilize the spots with a nitrogenous fertilizer. However, you must first rake your lawn two or three times to loosen up the moss and take off all surplus accumulations. Then apply a well-balanced fertilizer such as Vigoro. This should be done about three times during the season, raking the lawn well before each application.

House Plants

Every home should have plants of some kind as part of their furnishings. A live plant adds to the beauty and arrangement of your room. Plants are not hard to grow and will thrive with just a little care. The main thing is not to over-water as plants do not like wet feet—neither should they suffer from dryness. Fertilize occasionally and repot when the pots are full with roots.

The Story of the F. T. D. A.

These letters, F. T. D. A., are no longer a mystery to the public. For F. T. D. A. means floral service by telegraph. In other words, F. T. D. A. stands for the Florists' Telegraph Delivery Association. Which Association is composed of over six thousand bonded members. It is possible through this Association to deliver flowers almost anywhere in just a few hours time at the most, depending upon the distance.

There is no extra charge for this service. The actual cost of the telegram and the flowers is all that is paid by the purchaser. The full value of the order is delivered. Should occasion arise, such as the death of a relative or friend in some distant town, one can go to the nearest F. T. D. Florist and order whatever he chooses, and the flowers will be delivered in time for the funeral, with the card of the sender, expressing his sympathy. This is done by telegram. Each florist has a list of the other members. Any town of any size has one or more members of the Association. Where there is no florist, the flowers are sent out by the nearest member either by parcel post or by auto express. Any order received within a few hours of the time of a funeral, or the sailing time of a boat, or other such occasion, can be delivered promptly in time.

For orders less than \$2.00 the Association requests a service charge of 25 cents.

FLOWERS

For Every Purpose

A selection of annual flowers is difficult to make because of the large number of subjects. Here are a few classifications which will suggest uses and arrangements. The flowers mentioned are by no means all the annuals, but many of the most popular types are included:

For long stems for cutting—Asters, Calliopsis, Calendula, Giant Zinnias, Scabiosa, Cosmos.

Shorter stems for cutting—Marigolds, Snapdragons, Sweet peas, Annual Chrysanthemums, Bachelor buttons, and Sweet Sultans, Ten Weeks stocks, Dwarf zinnias, and Gypsophila.

For the shady portions—Pansies, Begonias, Torenia, Godetia, Forget-me-nots, Impatiens, Nemophila, Monkey flower.

For very hot situations—Sunflowers, Heliotrope, Portulaca, Ice plant, Petunias, Balsam, Annual gaillardia.

For light or poor soil—Nasturtiums, Clarkia, Godetia, Poppy, Portulaca, Zinnias.

Plants that bloom after frost—Sweet Alyssum, Bachelor buttons, Petunias, Marigolds, Calendulas, Candytuft, Stocks and Phlox Drummondii.

Tall flowers for background—Castor beans, Annual sunflowers, Cosmos, African Marigolds, Spider plant (Cleome), Plumy celosia or Cockscomb, clumps of Sweet peas, and the Flowering Tobaccos, particularly Nicotiana glauca.

For masses of color—Petunia, Zinnia, Marigolds, Calendulas, Phlox Drummondii, Verbena, Stock, Aster, Salvia and Poppies.

For edges and borders—Sweet alyssum, Dwarf Nasturtiums, Lobelia, Dwarf marigold, Ageratum, Virginia stocks and Forget-me-nots.

Fragrant plants—Mignonette, Heliotrope, Nasturtiums, Alyssum, Ten-weeks' stocks, Nicotiana, Matthiola bicornis, (evening scented stock) and Sweet peas.

Annual vines—Morning glories, Moonflowers, Japanese hop, Tall nasturtium, cardinal climbers, Cobaea, Cypress vine, Balloon vine, Scarlet runner and Hyacinth beans.

Perennial vines—Ampelopsis Australian pea vine, Clematis, Cobaea scandens, Lathyrus, Ipomoea, Wild cucumber, Mina lobata, Moon vine, Kudzu, Gourds, Maderia vine (bulbs), Wisteria, Cinnamon vine (bulbs).
